***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Maus (6,534,021 B1).

Maus teaches a fluid filter (see 1 in Fig. 4) comprising an outer casing (14), a filter assembly (10) received within the outer casing (14) comprising a plurality of corrugated filtering plates (12) and a plurality of flat filtering plates (see 13 in Fig. 3) alternated into the corrugated filtering plates (see 10 in Fig. 3) to overlap with corrugated filtering plates with a Z shaped manner so as to form a filter stack (see 1 in Fig. 3) wherein each of the corrugated filtering plates is reserved with two side plain edges and remaining portion of the corrugated filter plate is prepared corrugated ridge, wherein each of the corrugated filter plates is respectively welded onto a pair of neighboring flat filtering plates at opposed edges (see col. 13, line 63 through col. 14, line 2) such that two sides of the filter stack are enclosed with Z shaped ending alternatively applied as fluid inlet and outlet in practice (see Figs. 1-3, col. 10, lines 41-63).

Regarding to the numerical requirements of claims 3, 6, 8 and 9, the specification contains no disclosure of either the critical nature of these requirements or any unexpected results arising therefrom, and as such these requirements would be

arbitrary and therefore obvious. Applicant **must** show that these requirements are critical. *In re Woodruff, 16 USPQ 2d 1934.*
